Atlassian, Software Engineer

As part of the Jira Migration Platform team:

- Contributed to the company's #1 priority: server to cloud migrations. Maintained Jira Migration Target, a critical service with a 99.995% availability requirement for enterprise users
- Handled high severity incidents as part of on-call roster.

As part of the Resilience Engineering team:

- Increased adoption of chaos engineering experiments by automating the 'war game' process
- Reduced number of engineers required to run experiments, by consolidating load testing metrics, SRE 'golden metrics' and event-tracking into one place.
- Propagated network turbulence using AWS SSM documents, working within framework of the company's internal PaaS.

Other:

- Developed a collaborative graph-based user interface for Confluence, an enterprise wiki. [Patent US20220207086A1](#) 📄
- Pitched for, and drove an initiative for adoption of 'inner-source' documentation practices in internal services within the company
